| <u>Test Results:</u>          | <u>ASTM #</u> | <u>Results</u> | <u>Comments</u>  |
|-------------------------------|---------------|----------------|------------------|
| Water Absorption              | C-373         | 7.75%          | Unsealed         |
| Breaking Strength             | C-648         | 988 lbs        | 0.75" thickness  |
| Modulus of Rupture            | C-674         | 1374           | 0.75" thickness  |
| Abrasive Hardness             | C-501         | 27             |                  |
| Coefficient of Friction (COF) | C-1028-07     | 0.70           | Smooth Surface   |
| Coefficient of Friction (COF) | C-1028-07     | 0.77           | Light Sandblast  |
| Compressive Strength          | C-140-75      | 6027           | 0.825" thickness |

Notes:

Expect naturally occurring color variations typical for concrete, unglazed ceramic and stone tile products. Apply a quality sealer for wear factor improvement and ease of maintenance. Notify the factory in case of intended exterior use in freeze-thaw climates.
